Summary

Final Year B.Tech Electronics & Computer Engineering student with **RHCSA** and **DO188** certifications and hands-on experience in Linux, Docker, Kubernetes, Jenkins, GitHub Actions and AWS. Additional experience in Python, SQL and Power BI for data analysis. Seeking an internship in DevOps, cloud infrastructure or Linux systems.

Education

Bachelor of Electronics & Computer Engineering — MIT College, Chhatrapati Sambhajinagar 2023–2027
CGPA: 8.64

Skills

Linux & Systems: Red Hat Linux (RHEL), Linux Administration, Bash/Shell Scripting, SSH, Systemd, SELinux
Containers & Orchestration: Docker, Kubernetes, OpenShift
CI/CD & Version Control: Jenkins, GitHub Actions, CI/CD Pipelines, Git, GitHub
Cloud & Monitoring: AWS EC2, AWS IAM, Prometheus
Programming: Python, Core Java, JavaScript, HTML, CSS, Data Structures & Algorithms (DSA), Python AI Agents
Java Backend: Servlet & JSP, Spring Boot, Hibernate/JPA
Databases & Analytics: MySQL, SQL, MongoDB, Power BI, Tableau

Projects

DevSecOps CI/CD Pipeline — Flask Notes Application GitHub
Python, Flask, Docker, MongoDB, Jenkins, Trivy, Prometheus
- Built a 5-stage Jenkins CI/CD pipeline covering GitHub integration, security scanning, Docker builds and deployment, cutting manual effort by about 80%.
- Integrated Trivy for container image vulnerability scanning and containerized the Flask and MongoDB application for repeatable deployments.

Cloud Infrastructure Automation with GitHub Actions & AWS
GitHub Actions, Docker, Docker Hub, AWS EC2, SSH
- Automated Docker image builds, publishing to Docker Hub, and deployment to an AWS EC2 instance over SSH using GitHub Actions.
- Reduced deployment time to approximately 2–5 minutes through automated cloud deployment workflows.

MedChain — Medicine Supply Chain Tracking System GitHub
React, Vite, Node.js, Express, MongoDB, Solidity, Ethereum, Ethers.js, QR codes
- Contributed to a supply chain system that tracks medicines and helps verify their authenticity to detect counterfeits.
- Developed the backend (Node.js, Express, MongoDB) in a team; frontend and blockchain were handled by teammates.

Mutual Fund Analytics GitHub
Python, SQL, EDA, Power BI
- Collected and cleaned mutual fund data, performed exploratory data analysis, and stored it in a SQL database for querying.
- Built Power BI dashboards presenting fund performance insights (Bluestock Fintech internship).

Nifty 100 Financial Intelligence GitHub
Python, SQL, ETL, Streamlit
- Built an ETL pipeline that processes Nifty 100 company data into a SQL database.
- Developed a Streamlit application presenting financial insights, including alerts for potentially distressed companies.

Experience

Bluestock Fintech — Data Analytics Intern Remote, 2026
- Developed Python ETL pipelines for financial datasets: ingestion, cleaning, transformation and processing.
- Designed SQL databases and analytical workflows for structured financial data.
- Built financial analytics and Power BI dashboards for performance and business insights.
- Used Git and GitHub for version control. *Tech: Python, Pandas, SQL, Power BI, ETL.*

Certifications

- Red Hat Certified System Administrator (RHCSA) — Red Hat
- Red Hat OpenShift Development I (DO188) — Red Hat
- RHA Day: Linux & DevOps Fundamentals — Red Hat Academy
- Decoding DevOps – From Basics to Advanced Projects with AI — Udemy

Leadership & Activities

- **Event Head, IETE Student Forum** — Led technical events and workshops, coordinating teams and participants.
- **National-Level Hackathon Coordinator** — Supported hackathon planning, participant coordination and technical activities.
- **Technical Event Coordinator** — Organized technical workshops, coding events and student activities.
